## DETAILED ACTION

### *Response to Request for Continued Examination(RCE)*

1. This action is responsive to applicant's Request for Continued Examination(RCE) filed 9/14/01.
2. Independent claims 1,16-20 were amended by applicant's Amendment A. No claims were cancelled. No new claims were added.
3. Claims 1-20 are pending in this present action.

### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-20 are rejected under 35 USC 103(a) as unpatentable over Hawkins(US Pat. No: 6,029,146) in view of Lawrence(US Pat. No: 5,915,209) and further in view of Broka(US Pat. No: 5,809,483).
6. As per claims 1, 16-20 Hawkins teaches a method for using a digital electronic computer to process signals in generating output and providing a digital computer apparatus including a computer having a processor electrically connected to a memory device for storing and retrieving machine readable signals to an input device for receiving input data and converting the input data and to an output device for converting output data from the processor into output having a visual

presentation whereby the steps including entering financial characteristics sufficient for computing a price of preferred return investments(col 3 line 26-38). Lawrence teaches bond trading as preferred return investments (col 4 lines 62-col 5 line 48)(Fig 1)as well as the solicitation of bids and prices(col 5 lines 16-18). Hawkins teaches the trading of volumes of securities(col 8 lines 14-31)(Fig 4) and an associated supply schedule.Hawkins further teaches utilizing two remote digital electronic computers for effecting a preferred return instrument trade(Fig 3). Broka teaches a debt securities pricing system(Fig 10)(Fig 11) as well as specified issues(Fig 7/730) including a preferred-return securities auction(Fig 20(a))(Fig 20(b)) including offering sizes and handling amounts that buyers and sellers want to transact(Fig 21(a))(Fig 21(b)) as well as current preferred returns viewing(col 16 lines 5-48)(col 15 lines 4-11).Broka teaches a realtime trasding system(col 5 lines 20-45). It would have been obvious to one skilled in the art at the time of the invention to combine Hawkins in view of Lawrence to teach the above. The motivation to combine is to teach a system that can automatically disseminate accurate current informatiion on large volumes of bond trades as enunciated by Lawrence(col 3 lines 25-29) and disseminate this information to the trading crowd. Furthermore it also would have been obvious to combine Hawkins in view of Lawrence and further in view of Broka to teach the above. The motivation to combine is to terach an organized computerized trading system for compliance with SEC regulations as enunciated by Broka(col 1 lines 42-52).

7. Claims 2-15 are rejected because by their dependence they include the language of a rejected base claim.
